Frontend-focused Software Engineer with expertise in building scalable, high-performance web applications. Specialized in React, Next.js, and Tailwind CSS, with strong backend capabilities using Node.js and Express.js. Proficient in CI/CD automation with GitHub Actions and ensuring application reliability with Cypress testing. Passionate about delivering seamless user experiences and contributing to innovative, full-stack solutions.

WORK EXPERIENCE

Software Engineer

February 2023 – Present

Legal Doctrine – Algeria

- Designed and developed intuitive user interfaces and dashboards using React, Next.js, and Tailwind CSS, enhancing user engagement and application performance by 20%.
- Improved application quality and reliability through Cypress testing, ensuring smooth feature rollouts and reducing critical bugs by 95%.

Software Engineer

April 2021 – December 2022

Toki Studio – Italy

- Built and optimized backend services using Node.js and Express.js, streamlining data workflows and enhancing API efficiency by 30%.
- Delivered scalable, real-time features with WebSocket integration and automated deployment pipelines through CI/CD workflows with GitHub Actions, ensuring seamless product updates.
- Designed and implemented robust components, reducing code complexity and improving scalability

KEY PROJECTS

Lexonate CMS (Personal Project) / <https://lexonate-web.vercel.app/>

- Developed a CMS to manage text content and internalization, focusing on scalability and usability.
- Technologies: React, Next.js, Node.js, Tailwind CSS, Express.js.
